TESTA PRODUCE TO INSTALL METHANOL FUEL CELLS TO POWER WAREHOUSE PALLET JACKS**Another Wholesaler Chooses Oorja Protonics Fuel Cells**

FREMONT, CA – November 12, 2010 – Today, Oorja Protonics and Testa Produce announced the order of 20 OorjaPac Model III fuel cells. Testa Produce, which supplies all varieties of fresh fruits and vegetables (domestic and international), frozen, canned, and specialty products from their facility just west of the Loop in Chicagoland. Testa plans to use the fuel cells in its Chicago LEED certified distribution center.

“We are pleased that Testa Produce is using our fuel cells. Oorja is looking forward to continuing to build our relationship with Testa” said Sanjiv Malhotra, founder and CEO of Oorja Protonics. Testa’s leadership is showing that green solutions are good for business and the environment.”

The OorjaPac Model III operates as an on-board battery charger for Class 3 vehicles in the material handling industry. The OorjaPac’s on-board sensors keep the vehicle’s battery at a constant state of charge eliminating the need for battery swapping and rapid charging. The power system reduces the dependency on public utilities and reduces CO2 emissions by up to 66% when compared to charging batteries using the grid. Refueling takes less than one minute improving productivity and supplies enough power for an entire shift.

About Testa Produce

Testa Produce, Inc. is Chicagoland’s premier wholesale distributor of fresh and frozen fruits, vegetables and dairy as well as a variety of organic, specialty and local products. Testa was originally founded in 1912, and while many things have changed, one thing remains the same, the dedication to a quality product and service. In early 2011 Testa Produce will move into a new LEED certified Platinum (Pending) distribution facility. Through the environmental efforts they have taken, Testa hopes to revolutionize the way the foodservice distribution thinks about sustainability. For more information about how Testa is ‘going green’ visit www.testaproduce.com.

About Oorja Protonics

Founded in 2005, Oorja Protonics is the leader in providing reliable and economical liquid fuel cells for the material handling industry. By leveraging its breakthrough technologies, Oorja manufactures the most efficient and powerful portable liquid

fuel cells that significantly reduce operating costs and green house gas emissions. The company is headquartered in Fremont, CA. For more information, visit www.oorjaprotonics.com.
